

ALPHA SIREN AMPLIFIERS

Siren Systems

ALPHA12X.

Remote mounted amplifier with HANDS-FREE operation, multiple warning tones and horn ring over-ride capability. ALPHA Sirens allow easy set-up and configuration to meet local requirement.

FEATURES:

- Perfect for overt and covert applications.
- Five siren tones available. Use up to four tones: Wail, Yelp, Piercer or Hi/Low and Air Horn.
- Hands Free operation allows the driver to turn the siren ON, activate the YELP, WAIL or TWO TONE/PIERCER tones and turn the siren OFF from the vehicles road horn button. Hands free control allows the driver to control the siren system without taking his eyes off the road and hands off the steering wheel.
- Conveniently accessible dip switches on remote amplifier allows instant configuration of popular operating features.
- Output open/short circuit protection.
- ALPHA12X is offered with optional switch panels and will also operate from customer supplied switching controls. Ideal for use with the OPTI-LINK switch panel.

12 VDC	24 VDC	100 WATTS	HANDS FREE
 YELP	 WAIL	 2 TONE	 PIERCER
 AIR HORN	 CUSTOMER PROGRAM	2 YEAR WARRANTY	

Part Numbers:

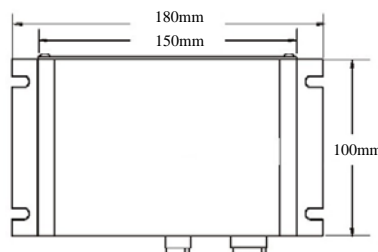

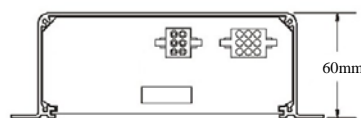

ALPHA12X - 12V remote amplifier.
ALPHA24X - 24V remote amplifier

Choice of two optional remote control heads for the Alpha siren.

The standard head (RH1002) allows manual selection or 'hands free' control of the siren.

The LFB head (RH1003) requires a separate on/off switch and features manual selection of tones and a tone change button. Hands free operation, 2 or 3 tones using horn or auxiliary control.
